PROFILE

For the past two years, my focus has been on developing my programming skills, particularly in React.js. I've completed projects like a Currency converter, MERN Todolist, and a Movie browser. Currently experimenting with various applications and I'm expanding skills in Express.js, Node.js, MongoDB, and Zustand, all while gearing up for creating a blockchain-based VOD platform. Currently, I'm engaged in an advanced project in the blockchain and web3, and I'm responsible for developing a Telegram bot and a Chrome browser plugin.

TECH STACK

React.js (Redux (Toolkit), Redux-Saga, React Hooks, React Router), Vite, Zustand
Next.js 13,
JavaScript (ES6+ features, async/await, Promises,), **TypeScript**,
HTML, **CSS** (BEM, Grid, Flexbox),
Tailwind CSS, **Styled Components**, **RWD**,
Storage API, **Rest API**, **TanStack Query**,
Tanstack Table, **Axios**,
Forms, **Figma**, **Trello**, **Teamwork**, **Code Review**, **Git**

EDUCATION

Master of Engineering

University of Agriculture in Cracow

03/2017 – 06/2018

Fermentation and beverage technology

Engineer

University of Agriculture in Cracow

09/2013 – 02/2017

Food technology

LANGUAGES

English - B2

Polish - Native

PORTFOLIO

Movie Browser

Techstack:

Next.js 13, TypeScript, TailwindCSS, classnames, TanStack Query, Axios, React-player, React-Modal, SVGR, webpack, Qs

About:

A fully responsive movie browser that pulls data from the MoviesDB API. On the site, users can search using the implemented search engine for movies, actors, and crew. The main page displays a list of the most popular movies in the form of tiles with basic data such as, poster, title, year of production, and category.

MERN - to do List

Techstack:

React.js, Vite, TypeScript, Zustand, React-Router, TailwindCSS, Express.js, MongoDB, Mongoose, TanStack Query

About:

A fully responsive todolist MERN stack app. The server created with Express.js is connected to cloud database made with MongoDB Atlas. Each user can create his own account and store todos there. The app have light and dark mode, user preferences are stored in browser localStorage.

Personal homepage

Techstack:

React.js, Styled-components, React-Redux, Redux-Saga, React-Router, Axios

About:

A fully responsive personal homepage made with React.js and React-Redux. On this site you can get more informations about me, download most updated CVs, and see all my projects at Github. The site have light and dark mode and users preferences are stored in browser localStorage.

Beer excise tax calculator

Techstack:

React.js, Vite, TypeScript, TailwindCSS, React-papaparse, Zustand, Tanstack Table

About:

A responsive application that downloads and then parses a .csv file into JSON format. The parsed data is then broken down into unit packs and barrels. The excise tax is then calculated on this base according to Polish tax law.
